Summary

As I celebrate my journey in the tech and engineering realms, I find joy in the intersection of my roles as a React Developer and a Petroleum Engineer.

With a background in Petroleum Engineering and valuable internship experience at OES in 2019, I embarked on a dynamic career path that led me to graduate in 2021. Following my graduation, I completed my service in 2023, marking the end of a chapter in the energy sector. #

Transitioning into the world of technology, I immersed myself in React development. Over the years, I've honed my skills, bringing innovation to the forefront. My journey has been marked by hands-on experience, and I've had the privilege of working on diverse projects.

From crafting e-commerce stores to developing a Netflix clone, my role as a React Developer has been an exhilarating journey of turning ideas into reality. Collaborating with companies like Midview and CyberVerdict, I've had the opportunity to contribute to their success through tailored software solutions.

My passion for coding extends beyond routine tasks. I'm driven by the constant pursuit of excellence, staying updated on industry trends, and actively seeking out opportunities to create meaningful and impactful applications.

I'm excited about the future, embracing new challenges, and continuing to bridge the gap between technology and industry. Let's connect, share insights, and explore the limitless possibilities that lie ahead!

Experience

Frontend Developer

Mid-View Healthcare Ltd

Jan 2024 - Feb 2024 (2 months)

Frontend Web Developer

Cyberverdict

Oct 2023 - Jan 2024 (4 months)

Restructure and fixing the typescript errors in the app

Education

University of Ibadan

Bachelor's degree, Petroleum Engineering

2016 - 2020

Skills
